

*35 Mellen Street Residence Hall, Lesley University*

In converting this small building from office use into a 23-bed dormitory, we added new side dormers and inserted new egress stairs within the volume of the roof, in order to transform a formerly unusable (and inaccessible) attic into a fully functional third floor.

We also added a generous front porch that faces Lesley's main quadrangle and facilitates ramped wheelchair access.

*Completed Summer 2006.*

*Before renovation*
