

*Harvard University Financial Administration*

This densely populated office suite contains 60 cubicles and 20 private offices for the university's accounting, payroll and procurement groups. In addition to designing the reconfiguration of the space to maximize its efficiency, we selected and specified the furniture throughout.

Our choice of finishes – including the (faux) cherry corners and cap trims and the fabrics for the cubicle panels and chairs – enliven the large clusters of cubicles. Our use of glass allows daylight deep into the floor, to improve the working environment.

*Completed Spring 2006.*
