

*Gilliland Lecture Hall, MIT Chemical Engineering (Building 66)*

A major renovation of this 100-seat stepped lecture hall in an I.M.Pei building from the early 1970s. Stepped risers were rebuilt for code compliance of row widths. Seating and finishes were replaced. A new air handler provides improved air quality, and up-to-date AV and lighting systems installed.

*Completed Summer 2003.*
